

Information Security Management Systems Lead Auditor (5 Days)

Australian
Organisation for
Quality - Queensland
(AOQ-QLD)

This training session outlines the key processes and approaches a business needs to manage information security risk in a practical way. The course covers how to implement and audit an information security management system adhering to the specific requirements of ISO/IEC 27001. A key outcome of the course is to teach participants how to protect information assets such as customer details, sensitive corporate information and financial data.
