

## Six Sigma Yellow Belt (2 Days)

Australian  
Organisation for  
Quality - Queensland  
(AOQ-QLD)

Six Sigma is a business process improvement strategy focusing on achieving measurable and quantifiable financial returns from any improvement project through the removal of waste and variation.

The Yellow Belt certification provides a general introduction to the principles of Lean Six Sigma (LSS) and information about working as part of a LSS team to support the more advanced Green and Black Belts. Yellow Belts will conduct the research, analysis, and solution development and therefore, the role Yellow Belts play is of profound importance. Team responsibilities will be explained which helps achieve enhanced efficiency of team members and produce a boost in performance quality and overall project accomplishments.

### Learning Outcomes

- > Understanding LSS methodology – DMAIC (Define-Measure-Analyse-Improve-Control) and DFSS (Design for Six Sigma)
- > Applying models and metrics to show the LSS impact
- > Comprehensive Overview of 5s Model including hands-on exercises
- > Analytical Problem Solving and Data Analysis Tools
- > Process Mapping
- > Failure Modes and Effects Analysis
- > Root Cause Analysis
- > Facilitating Successful Rapid Improvement/Kaizen Events
- > Mistake Proofing
- > Operational Excellence Procedures
- > Value Stream Mapping

### Who Should Attend

Anyone involved in business improvement and:

- > improve their employability
- > be a valuable improvement team member
- > progress to a Green Belt
